

CLAIMS

1 1. A fishing device, comprising a substantially rigid lower
2 member; a lee attached to said lower member; and a net having a lower end
3 attached to said lower member and an upper end vertically spaced from it, said
4 net being slidable over said lee so that when fish hits said net said net slides
5 over said lee and forms a bag in which fish is caught.

05735577225568
1 2. A fishing device as defined in claim 1, wherein said lee
2 includes two lee members connected to opposite ends of said lower member
3 and both connected to a main lee

004427164400
1 3. A fishing device as defined in claim 2, wherein said additional
2 lees and said lower member form substantially a triangle in which said net is
3 arranged before being hit by fish

1 4. A fishing device as defined in claim 1; and further comprising
2 float means attached to said net and keeping it in a substantially vertical position.

1 5. A fishing device as defined in claim 1; and further comprising
2 a bait.
